SUMMARY

Computer Science major graduating in February 2027, with freelance experience delivering a live event website and building booking applications using React and Next.js. Skilled in responsive design, TypeScript, API integration, and Figma, with some backend development experience. Seeking a frontend opportunity to contribute to real projects and grow my development skills.

WORK EXPERIENCE

Freelance

[Limitless Vibes](#) | Dead Sea Festival

- Built and deployed a public event website using TypeScript and Prisma.
- Turned festival content into responsive pages for visitors to explore event information.

PROJECTS

Cinema Booking System | React, Supabase, PostgreSQL, TMDB API, React Router, Figma

- Designed the interface in Figma and built routed booking views using React hooks, TMDB movie data, and a Supabase database.

The Wild Oasis Website | Next.js, NextAuth.js, Google sign-in

- Built a guest-facing hotel website for browsing rooms and making bookings, with authentication and account access.

The Wild Oasis | React, PostgreSQL, Supabase, React Hot Toast

- Built a hotel admin dashboard to manage rooms and bookings, with database-backed data and action feedback.

StaySmart | Figma, HTML, CSS, JavaScript, PHP, SQL, XAMPP

- Designed and developed a responsive hotel booking system with a PHP and SQL backend.

EDUCATION

B.Sc. in Computer Science | Middle East University, Jordan | Expected February 2027

Previous study: Al-Hussein Technical University

Courses: Data Structures; Algorithm Design and Analysis; System Analysis and Design
