SUMMARY

Computer Science major graduating in February 2027, with freelance experience delivering a live event website and building booking applications using React and Next.js. Skilled in responsive design, TypeScript, API integration, and Figma, with some backend development experience. Seeking a frontend opportunity to contribute to real projects and grow my development skills.

WORK EXPERIENCE

Freelance

[Limitless Vibes](#) | Dead Sea Festival

- Built and deployed a public event website using TypeScript and Prisma.
- Turned festival content into responsive pages for visitors to explore event information.

PROJECTS

Taj Cinemas - Movie Booking System | React, Supabase, PostgreSQL, TMDB API, React Router, Figma

- Allowed users to select cinema locations, browse movies, book specific seats, and manage bookings seamlessly.
- Integrated TMDB API for dynamic movie details and Supabase database for persistent data management.
- Handled payment states and aborted transactions via local storage, optimizing performance using useMemo for caching.

The Wild Oasis — Hotel Booking & Management System | React, Next.js, JavaScript, Supabase, React Query, Tailwind CSS, Styled Components

- Developed a customer website where guests can browse cabins, check available dates, and create, update, or cancel reservations.
- Built an employee dashboard to manage cabins, bookings, guest check-ins and check-outs, and hotel settings.
- Integrated Supabase for data storage, employee authentication, and image uploads, with Google sign-in for guests.
- Added dashboard charts for sales and occupancy, plus filtering, sorting, and pagination for bookings.

EDUCATION

Bachelor of Science in Computer Science

- Started studies at Al-Hussein Technical University (Oct 2021 – Sep 2024)
- Completed degree at Middle East University (Oct 2024 – Feb 2027)
